- Country offices
- Planned offices
- Project/client links

Global project examples

Annex 4
A compilation of case studies, policies and strategies associated with the environmental impacts of wave and tidal technology around the world

International ICE programmes
Aquatera is currently pursuing initiatives to set up centres of excellence for marine energy in Chile, the Caribbean, Japan, Philippines, Indonesia and Orkney, Scotland

Bridge project
Aquatera hosted interns who came to Scotland during the summer of 2015 as part of this initiative funded by the Inter-American Development Bank (IADB)

AQUA-TIDAL
A global database of over 11,000 tidal stream records and 1000 Ocean current records. Believe to be the largest database of tidal resource sites yet compiled.

Ocean Energy Islands
A database with information from over 100 island ocean energy markets.
